## METRODECK (Nippon Steel Corporation)

### \*Shape and Type

Each METRODECK consists of five checkered wide flange beams with anti-skid patterns hot rolled on the flange surfaces.

These beams are cut into specified lengths, welded together and reinforced with plates as required.

All METRODECKs are rectangular in shape.

Width x Length x Thickness (mm)	Area (m <sup>2</sup> )	Weight (kg / Sheet)
1,000 x 2,000 x 208	2.00	368

### \*Method of Installation

METRODECKs of this type can be installed by simply setting them on support beams without any fixing operations.

Angle is welded to both ends on the bottom side of each METRODECK as a stopper to prevent horizontal movement.
